ACTIVITY DESCRIPTIONS

NATURE ART allows children to realise their full artistic potential as they collect natural materials for handmade paints, and create an artistic masterpiece inspired by their time outdoors.

NATURE CRAFT lets children's creativity run wild as they create new cities for the bugs of Woodhouse and build leaf boats to sail down the stream.

PONDING ADVENTURE will have children exploring our on-site wetlands, and investigating local water bugs in their natural habitats.

SHELTER BUILDING is the perfect opportunity for budding builders to design and build their very own palace.

WOODHOUSE EXPLORERS will unlock every child's inner treasure hunter as they explore our outdoor wonderland, looking for natural treasures, and if they're lucky, spotting some of our local wildlife.

WIDE GAMES is all about burning energy! Get moving with a range of exciting team-based games and challenges.
